To Whom It May Concern

I am honored to write a reference letter to Mr. Jônatas Peixoto whom I have known since August 2015. Jonatas and I met through being co-workers at Bram Offshore - A Brazilian Company from ECO Group – Edison Chouest Offshore. Jonatas has already worked with me during dock time, shipyard time when my current vessel was being built, also when my current vessel was applying for a contract with Petrobras, during Port and Flag State Inspections and other Regulatory Surveys always giving an amazing support that helped me and my Crew achieve remarkable inspectors' evaluation.

Jonatas is a true optimist, and it is his positive and always ready attitude that helps him and to accomplish whatever task he is been assigned. Before any inspection, he gives us (Me and my crew) full support performing Pre-Inspections in order to train us to find possible penalties and correct before the survey. During the Inspections, he goes along with us and if the Surveyor tries to sentence a penalty without a proper technical embassing, Peixoto politely confronts with International, National Codes and Regulations and also with Contractual items that doesn't allows the Inspector to place such penalty.

I realize an great improvement after Peixoto has joined the company in the Contractual Manager thanks to his applied work. I mean, applied work because he uses old Inspections as a basement for next ones. He creates lists with old inspections penalties and send it to all vessels, so everybody can learn and can be well prepared before any Inspection take place.

With those lists Peixoto has been able to create indicators and performed an presentation, which I had the pleasure to see, with graphics and numbers evidencing with many examples the development of the Inspections and the reduce of Company's costs with Penalty Inspections within the years..

In my opinion Peixoto has established to not to well know vessels and its systems and characteristics, but also has an great analytical judgment of data, as I was able to see in his presentation. Capable of planning an efficient Task Force to almost vanish penalties. I can also add he is a honest, competent, qualified and moralist.

Above all his professional qualities and achievements, the thing that I admire most in Peixoto is his Teamwork, he is always there when we need him.

Sincerely,

Igor Emidio Cavalcante

Letter of Recommendation

To whom it may concern,

It is a pleasure to write a letter of recommendation for Jonatas Peixoto. I am happy to write this letter of recommendation for him. In this letter I would like to express my respect and appreciation for this bright young person, who brought outstanding contribution to the work of my team.

He is reliable and intelligent person. If his performance in our company is a good indication of how he would perform in yours, he would be an extremely positive asset to your company. He has a broad range of skills, including maintenance manager, surveiors analisys and predictive data.

In my opinion, Peixoto is a hard-working self-starter who invariably understands exactly what a project is all about and consistently produces high quality work in a timely fashion. He finishes her work on schedule. When he has a concern or question about an assignment, he speaks his mind clearly and directly, giving voice to what others may feel but cannot or will not say.

I am confident that Peixoto will continue to be very productive. He has my highest recommendation.

Best Regards,

Nelson Anselmo Junior
